## Zika Virus: What you need to know

### Zika is:

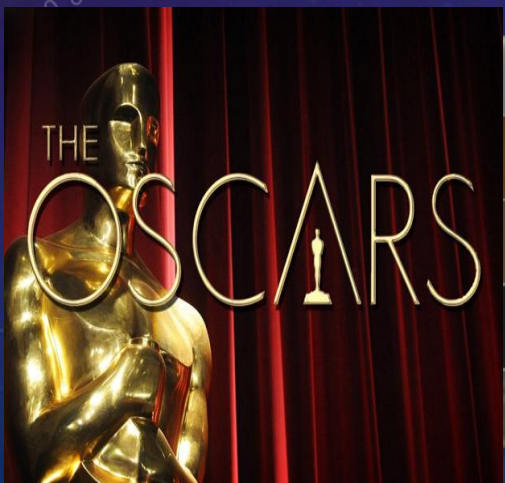

- A virus spread through Aedes species mosquito bites. Aedes mosquitoes also spread dengue and chikungunya viruses.
- A risk to anyone traveling to a region of the world where Zika virus is found.

### Global risk

Outbreaks have occurred in parts of Africa, Southeast Asia, and the Pacific Islands. In May 2015, Brazil reported the first outbreak of Zika virus in the Americas.

Zika virus is not currently found in the United States. However, cases of Zika have been previously reported in returning travelers.
