Regions » The tragedy of Turkey's attempted coup

By Jenny White

🕒 Updated 1456 GMT (2256 HKT) July 16, 2016

This time, thousands of Erdogan supporters heeded his call to take to the streets. They threw themselves in front of tanks and cornered terrified looking soldiers as minarets called for jihad.

Yet ultimately, whether the coup succeeds or not, this brings the prospect of civil war closer -- and heightens the likelihood of a lost generation before Turkey can rebuild the image of itself. It is a dramatic departure from just five years ago, when the country had earned the respect and admiration of the world.
